

Appendix 13B Task Summary & Prioritization

It may be useful to extract all of the management tasks from the plan and summarize them in a single table. The table allows all of the management tasks to be viewed at a glance. The same table can be used to indicate the priority level of each task, or the time frame in which it should be completed. This table (modified from Ferren, W.R., Page, H.M., and P. Saley. 1997. Management Plan for Carpinteria Salt Marsh, A Southern California Estuary) provides an example of how tasks might be placed in one of three priority categories.

Task #	Task	Priority
4.0 Administration		
Goal 1. Provide a rapid responses protocol for potential catastrophic events that would threaten Carpinteria Salt Marsh		
<i>Objective 1-1. Coordinate with the appropriate agencies, corporation, and property owners to protect the estuary from terrestrial oil and hazardous material spills</i>		
Task 1-1.1	Work with the State Office of Oil Spill Prevention and Response (OSPR), Clean Seas, and others to identify potential hazards from roads, Highway 101, the railroad right-of-way, and other potential sources	B
Task 1-1.2	Work with the State Office of Oil Spill Prevention and Response (OSPR), Clean Seas, and others to develop and implement a contingency plan for response to potentially hazardous events	C
Task 1-1.3	Work with Union Pacific Railroad and others to develop and implement a contingency plan for railroad related accidents that may directly or indirectly harm the marsh	C
<i>Objective 1-2. Coordinate with the Flood Control District to develop and implement a plan to reduce flood threats in and around the Carpinteria Salt Marsh</i>		
Task 1-2.1	Assist the Flood Control District in the sponsoring, permitting, and implementation of the Carpinteria Marsh Enhancement Plan as outlined in the Restoration and Enhancement and Flood Control Programs	A

- A Priority: High priority management tasks
- B Priority: Medium priority management tasks
- C Priority: Low priority management tasks
